

Datasheet // FlexLite & LineLite

SignTerminal

Our SignTerminal is an unfused 6 channel interface, which is placed between the power supply and the sign. It enables an easy and fast connection.

Key Features

- Designed as a low cost, unfused distribution box
- Designed to guarantee an easy and fast installation
- Rated for 100 Quantum modules (or its electrical equivalent)
- 1x solder pad connection
- 6x interface for dedicated Stogger power cable
- Mates with Molex 502578-0200 connector

Design Prize

Technical specifications

Dimensions (L x W x H)	65 x 17 x 9 mm
Input	1x solder pads, rated for 2A (100W equivalent @ 48V)
Output	6x 48V
Control	None
Safety	None
Connect up to 100 LED modules*	Do not exceed 100 LED modules to prevent overload and fire risks
IP grade	For IP65 protection grade, use heat shrink tube
